

WEB SIGNUP FORM

Create New Form

Chapman Marketing Design can give your website additional power through a custom Web Signup Form. By Simply including this code, a Web Signup Form will send any data collected online into your text messaging account.

[Account Profile](#) | [Web Integration](#) | [Buy Messages and Keywords](#) | [Account Set-up Features](#) | [Log Out](#)

Website Integration

Select the link on the Toolbar at the top right section on the Homepage to access this facility.

[Send Message](#) | [SMS Keywords](#) | [Contacts](#) | [Inbox](#)

Web Signup

Create a web signup box for your website. The websign up box allows people to subscribe to your account quickly and easily.

Web Signup Name: Friendly name
Return URL: URL for the "thank you" page

Web Sign Up

By utilising this feature, clients can integrate a simple customer Web Sign Up Form to capture data.

You can build the form to your own specifications.

Proceed

After you have given your Web Sign Up Form a name and completed the URL 'thank you' link, select the **'Add'** button to proceed and configure your form.

Configure SignUp Form

Custom build your form – adding data fields which will match your business needs. You can also change the style to make it blend in with your website

[Delete this web signup form](#)

Sign Up Form Label

This is the name your Sign Up Form will be listed as.

Website Coding

The HTML script located in the shaded box is all that is required to facilitate the Web Sign Up Form.

Either include this into your website coding or ask your webmaster to do this for you.

Data Fields

Your default data fields: First name, Surname, and Mobile number are marked as 'required'.

Amend the order of listing for these fields by using the green 'up' and 'down' arrows or delete them with the 'red cross'.

Advanced Options

Configure your 'disclaimer text' or amend graphic features such as the 'Save' button.

Select confirmation option – via text message or email.

Additionally set up alerts to notify you when customers sign up to your account either via email or text

Preview

Once you are happy with your form and options, select this link to preview the end result

Adding New Fields

Add additional fields by selecting from the drop down menu in **Field Type**

Email

- Email
- Gender
- DOB
- Address 1
- Address 2
- City
- State
- ZIP

Select the new data field you wish to include in your form, check the 'required' box if appropriate and position .

If there is other data that you would like to capture in your form you will need to go to:

Account Profile > Account Data Fields > Add New Field > to add your field.

Styling

You may alter the styling of the box with your own coding – however we would only recommend this for persons who are familiar with CSS styling.

Preview Form

Before going live – preview your form here. Amend your CSS styling here as well.

About these CSS Effects

Close

You can control the appearance of the web capture form using CSS. Below is the CSS classes & example styles. Click [here](#) to download the CSS style sheet.

```
.WC_Table( /* The Table */
    font-family: verdana;
    font-size: 12px;
    color: #616161;
)
.WC_Left( /* Page text column */
    width: 125px;
    padding-left: 5px;
    height: 20px;
)
.WC_Middle( /* Fields column */
    width: 155px;
)
.WC_Right( /* Submit column */
    width: 55px;
)
.WC_TextField( /* Field input tag */
    width: 150px;
    height: 18px;
    font-family: verdana;
    font-size: 12px;
    color: #616161;
)
.WC_DropDown( /* Drop down boxes */
    width: 150px;
    font-family: verdana;
    font-size: 12px;
```

Preview

After setting your options your final Web Sign Up Form is ready for viewing.

If you need to make any changes, simply return to the previous page to make the alterations.

This is how your Web Sign Up Form will appear in your website.
